1. Pharmacological approaches to management of neuropsychiatric behaviours in dementia.

## How to participate:

- **You must register in advance for this meeting.** After registering, you will receive a confirmation email containing information about how to join. [Click here to register](#)
- If you have any Zoom questions, please contact [Agnes Cheng Tsallis](#)
- If your organization does not support Zoom, the session will also be accessible through YouTube Live link available the day of the session
- To be included on the distribution list for these rounds, please contact [Salma Shaikh](#)

## Certificate of Completion

- With completion of [the feedback survey](#) after the session, you have the option to submit your name and contact details if you wish to receive a certificate of completion for attending the Behavioural Support Rounds

These Rounds are open to all health professionals and students and provide a learning forum to review leading practices in the assessment and supportive management of challenging responsive behaviours in individuals living with dementia. The purpose is to offer practical approaches to support the work of front-line healthcare providers in caring for persons with responsive behaviours.

Accessible through Zoom, these Rounds are co-sponsored by the Baycrest Toronto Central – LHIN Behaviour Support for Seniors Program and the Ontario Centres for Learning, Research and Innovation in Long-Term Care at Baycrest.

**Your feedback is valued! Please submit your anonymous evaluation [here](#)**
